

Harvard Pilgrim Health Care Awards Mini Grant to Trinity Catholic Academy

Trinity Catholic Academy has been awarded a *Harvard Pilgrim Community Spirit 9/11 Mini-grant*. Harvard Pilgrim employee Anthony Gray nominated Trinity Catholic Academy to receive the grant to help update technology in the classroom. The mini-grant will be matched by the Trinity Catholic Academy PTO for the remainder of the cost of a Smartboard including installation. The use of a Smartboard in the classroom, especially in providing stimulating, creative and interactive lessons for our students, has the advantage of reaching across learning styles and across the curriculum, while giving students access to first class materials. The ability to take students on virtual field trips around the world or view current events all while coordinating with curriculum is another advantage for our students.

Mr. Gray's wife, Evelyn Gray, is a teacher at Trinity Catholic Academy. The Community Spirit 9/11 Mini-grants Program was created by Harvard Pilgrim Health Care to commemorate the first anniversary of September 11, 2001 through a special contribution to its Foundation. The Foundation distributes the Mini-grants to non-profit organizations that have been recommended by Harvard Pilgrim Health Care and Perot Systems employees.
